- Health conscious people interested in enjoying a **better quality of life, more energy or slowing down of the aging process**.
- Animals also benefit from Cantron®-people report that their pets **live longer, are much friskier and maintain luxurious coats of fur even in advanced age**.

What is Cantron®?

Cantron® is an amazing Bio-electrical Wellness Formulation that has been manufactured and distributed in the United States since 1984. It has developed a fabulous reputation throughout its 37 year history. It provides **astonishing health benefits like no other substance on Earth**.

It is the world's most potent scavenger of health damaging free radicals, and **the resultant damaged proteins which** accumulate in the blood, tissues, organs and joints; all of which are known to be responsible for serious health conditions.

There are **many internal and external factors which form free radicals** and the damaged cells which result as a consequence: tobacco smoke, excessive alcohol, radiation including ultraviolet radiation from the sun, auto exhaust, pesticides, herbicides, pollution, prescription drug use, chemotherapy, surgery, breakdown of bacteria by white blood cells, microbial or viral infections, metabolism of toxins, inflammatory processes, byproducts of oxygen metabolism, stress, shock, trauma, hypoxia, enzymatic reactions, calorie consumption, poor diet and many food materials especially oxidizing hydrogenated oils.

Regular use of Cantron® may help counter these negative effects on health. Cantron® is known to dramatically aid the body's own natural defenses, as it helps to maintain proper cellular metabolism and immune system function. It has received rave reviews from those who have taken it. One customer summed it up perfectly on an Internet chat site when she emphatically stated: **"How blessed we are to know about Cantron®."**

Figure 1- For those who elect to smoke despite the health risks, Cantron® can help mitigate free radical damage to lungs caused by smoking or the liver caused by excessive drinking

What is the Composition of Cantron®?

The ingredients in Cantron® were initially selected for their bioelectrical properties and for their beneficial roles in supporting normal cellular respiration (energy production within cells). Later it was discovered that the selected chemicals possessed the most powerful antioxidant properties known to man. The ingredients- which are phenolic antioxidant compounds such as flavonoids (a.k.a. bioflavonoids or vitamin P), phenols, polyphenols, catechins (catechols), quinones and cyclopentenones. They are organic compounds that contain natural healing powers. These beneficial compounds naturally occur in fruits, berries, wine, chocolates/cocoa, plant foods, herbs, tea leaves, spices, olive oil, nuts, bee pollen, honey and in the human body.
