

Cantron™

ELECTROLYTE &

ANTIOXIDANT FORMULA

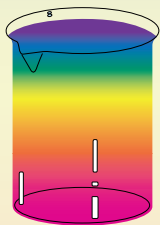

**The Amazing Bio-Electrical
Wellness Formulation**

Explaining our Cantron label

Cantron is the brand name for our enhanced version of the Enteleev formula which was invented by James Vincent Sheridan, a brilliant chemist and wonderful humanitarian.

Mr. Sheridan credits his discovery in part to his *advanced studies in chemistry, a chance event in the laboratory* and in part to a *dream* which he believes came from divine inspiration. Our *Cantron label* is a depiction of the 3 events which inspired the creation and development of Enteleev (a.k.a. Cantron and Cancell) as told by Mr. Sheridan.

* Event # One:

In 1931, Jim Sheridan was working in an analytical chemistry lab. He was at a step in the process which resulted in a beaker full of yellow colored liquid.

A student asked him, “Is that color due to chromate?”

Sheridan: “yes”

Student: “How can you change that color?”

Sheridan: “Just add an acid. It will produce a bright red color.”

Student: “What acid?”

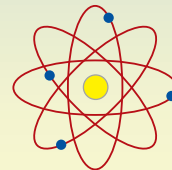

Sheridan: “Any acid. Here I’ll show you.”

Jim went to the shelf of acids, picked one at random and added it to the yellow liquid. He got the surprise of his life! The liquid broke into 6 bands of color- the rainbow colors in rainbow order, Red-Orange-Yellow-Green-Blue-Violet.

As Jim described it, “the boys eyes popped out and my eyes double popped out!” The entire class and several professors gathered around. Others in the class tried the experiment and it worked. However, no other acid worked.

One of the professors said, “That looks like a case of *rhythmic banding* where the width of each band will be 2.7 times the width of the

band above it.” They measured the bands. Indeed it was true.

* Event # Two:

About one month after the ‘rhythmic banding’ event, Jim began a long term research project on *The Debye Theory* which had been published in 1927. His task was to check out the validity of the theory which dealt with respiratory enzymes. He spent 3 years studying and doing research experiments on the Debye Theory.

* Event # Three:

On the afternoon of September 6, 1936 Jim Sheridan had a dream while taking a nap. *The dream brought together the event of the rainbow in the beaker and his work on the Debye Theory.*

In the dream, the layers of the rainbow represented the respiratory enzymes of the cell. Each color represented an enzyme at a specific redox level in the cell. The electrons from the Debye theory represented the energy units in the respiration moving from glucose to oxygen via the respiratory system. Somehow the dream suggested to Mr. Sheridan the possibility of enhancing the proper pathway of energy flow and energy

production in the respiratory system to promote healthy cell functioning.

Our label

The *colors on this label* represents the rhythmic banding in the beaker and of course the corresponding rainbow in Mr. Sheridan's dream.

The *electron* represents the Debye Theory and the electrical nature of the Cantron Formula.

The *cross* represents the belief that Mr. Sheridan's dream was divinely

inspired. Mr. Sheridan was a devout Christian. In the nature of true Christian brotherhood, Mr. Sheridan wanted people of all classes, creeds, races and ethnic backgrounds to have access to his formulation at an affordable price.

Since Mr. Sheridan believed that this dream was divinely inspired, he refused to receive any compensation for this idea. Despite urging him to accept a royalty from the sales of my Cantron formula, he firmly declined on more than one occasion. Jim Sheridan freely gave this formula as a gift to all the people of the world.

See our tribute to Jim Sheridan ('The Chief') and 3 other great men on the next page.

Be Well!

A Tribute To "The Chief"

and 3 Other Great Men

Both Jim Sheridan and Ed Sopcak passed away 20 years ago. I pay tribute to these great men.

Mr. Sheridan suffered for many years with symptoms of Alzheimer's disease. Ed suffered with symptoms of a stroke and died just three weeks after Jim. Both men will be missed but never forgotten.

I also wish to pay a belated tribute to two other great men, Don Wilson who died in 1984 and Professor Orz Feather who died in 1987. All of these great men helped me bring Entelef/Cantron to the world

'The Chief' was the affectionate name we used to for our leader, Jim Sheridan. In retrospect, when telling the story of our origins in this project, I refer to myself and my associates (Don, Orz and Ed) as his 'Indians.' We always deferred to the wishes of 'The Chief' and helped fulfill his dream to bring his wonderful product to the world. Mr. Sheridan always believed that he got his 'marching orders' from the great Spirit in the sky. We got our 'marching orders' from Mr. Sheridan. I will always be honored to have been chosen to serve humanity in this capacity.

A devout Christian gentlemen, Mr. Sheridan believed that the Entelef (Cantron) formula was given to him in a divinely inspired dream. He refused any financial compensation, claiming Entelef was "a gift from God to all his children." Mr. Sheridan spent his whole life researching Entelef and trying to bring it to the suffering people of the world. When he could not get his product approved, he gave the product away for free. Such altruism is rare in human history.

To properly eulogize Mr. Sheridan, I will quote from two passages in Don Wilson's book manuscript which is in my possession. The first passage relates to

Don's first meeting with "the Chief:"

"I remember the first time I shook hands with this kindly magnetic little man. His eyes sparkled with electricity, his tongue with Irish wit and bon vivant. Here, I thought is truly a remarkable giant of a man. How much I underestimated him. This kind little man was a giant with a heart and soul almost as big as the creator."

Ed Sopcak was the last of the Indians to join the project. He played a major role in the Entelef movement. He helped me produce Cantron for many years and was the founder of Cancell. Ed was very vocal about his beliefs and as a result he helped popularize this wonderful product.

In March 84 issue of the 'Detroit Monthly' magazine, written by Michael Wendland, Don Wilson was described as "Sheridan's most vocal and persistent defender." This is an accurate depiction of this great man. He was working on a book about Entelef. On Mr. Sheridan's behalf, he brought in a pharmaceutical company to research Entelef. He brought myself, Orz Feather and Ed Sopcak into the project. Accordingly, I credit him as the father of Cantron and Cancell.

Orz Feather was a chemistry professor and an inventor. He was a wonderful, good-spirited and brilliant man who volunteered his time to help me develop Entelef/Cantron. He also assisted Jim Sheridan in his research endeavors.

I will be forever grateful for 'The chief' and my fellow 'Indians' who served humanity so well. I will always keep fond memories of them deep in my heart. May they rest in eternal peace.
